## Diferansiyel Tiroid Kanserinde Lokorejyonel Nüks

- Prof. Dr. Reyhan ERSOY
- Doç. Dr. Ahmet DİRİKOÇ
- Dr. Öğr. Üyesi Berna ÖĞMEN

### Özet

Diferansiyel tiroid kanseri çok iyi bir prognoza sahiptir, bununla birlikte bazı hastalarda nüks görülebilmektedir. Nüks en sık boyunda görülür ve cerrahi eksizyon ile düşük morbiditeyle çok iyi bir şekilde tedavi edilebilir. Tiroid kanserinin lokal tedavisinde bildirilen yeni tedavi seçenekleri olsa da, bu tədaviləri sağkalım ilə ilişkilendirmek üçün daha uzun süreli çalışmalar gerekmektedir.

Yüksek riskli kanseri veya yaygın hastalıkla ilişkili klinik semptomları olan hastalar, uzak yayılımı dışlamak ve uygun tedavi edilmek için ultrasona ek olarak kesitsel görüntüleme ile de değerlendirilmelidir.

Nüks tiroid kanserli hastalar için en iyi tedavi, multidisipliner bir ekibin hasta merkezli tedavi planına dahil olması durumunda sağlanır.
