Diferansiyel Tiroid Kanserlerinde Kemoterapi ve Hedef Tedaviler

- Uzm. Dr. Mutlu HIZAL
- Doç. Dr. Mehmet Ali Nahit ŞENDUR

Özet

Tiroid kanserleri 2018 yılı verilerine göre tüm dünyada görülen yeni kanser vakalarının %3,1'ine ve kanser ilişkili mortalitenin %0,4'üne neden olurlar. Literatürde metastaz geliştiren hastaların oranı %7-23 olarak bildirilmiştir ve bu hastaların 2/3'ü radyoaktif iyot (RAİ) tedavisine direnç gelişirmektedir. RAİ refrakter hastalar için ise metastaz saptanan andan itibaren beklenen 10 yıllık sağkalım %10'a inmektedir. RAİ refrakter diferansiyel tiroid kanserlerinin patogenezine ilişkin bilgilerimizde ve hastalığa karşı geliştirilen tedavilerin etkinliğinde son on yılda ciddi gelişmeler mevcuttur. Sitotoksik kemoterapilerle elde edilemeyen yanıt oranları ve hastalık kontrol sürelerine hedeflenmiş tedavilerle ulaşılmıştır. Sorafenib ve Lenvatinib başta olmak üzere anti-VEGF tedaviler, V600E mutasyonu olan hastalarda BRAF inhibitörleri, kanser alt tipinden bağımsız kullanılan TRK inhibitörleri gibi birçok hedeflenmiş tedavi ajanı etkinlik göstermiştir. Bir diğer başlık henüz tiroid kanseri tedavisinde aktif rol almayan ancak günümüz itibarıyle kanser tarihinde ciddi kırırmalara yol açan immünoterapidir. Kontrol noktası inhibitörleri olan İpilimumab, Nivolumab, Pembrolizumab, Atezolizumab, Durvalumab ve Avelumab birçok kanser tipinde kullanılmaktadır. Tiroid kanserlerinde de bu ajanların monoterapi veya kombinasyon halinde test edildiği birçok çalışma devam etmektedir.

Tablo 2 Diferansiyel Tiroid Kanserlerinde Devam Eden Bazı Faz 2 ve 3 Çalışmalar

Çalışmanın Adı	Kodu	Fazı	İlaç	Bitiş Tarihi
Adaptive Tyrosine Kinase Inhibitor (TKI) Therapy In Patients With Thyroid Cancer	NCT03630120	2	Lenvatinib, Sorafenib, Cabozantinib, Vandetanib	Aralık 2023
Iodine I-131 With or Without Selumetinib in Treating Patients With Recurrent or Metastatic Thyroid Cancer	NCT02393690	2	Selumetinib+ RAI	Ağustos 2020
Trametinib in Increasing Tumoral Iodine Incorporation in Patients With Recurrent or Metastatic Thyroid Cancer	NCT02152995	2	Trametinib	?
Nivolumab Plus Ipilimumab in Thyroid Cancer	NCT03246958	2	Nivolumab+ Ipilimumab	Mart 2025
Durvalumab Plus Tremelimumab for the Treatment of Patients With Progressive, Refractory Advanced Thyroid Carcinoma -The DUTHY Trial	NCT03753919	2	Durvalumab+ Tremelimumab	Temmuz 2021
