Preface

Many studies have been conducted in the world regarding the level of physical activity and cognitive development. Based on the authors' collective expertise, this book demonstrates how aerobic exercise can affect individuals' cognitive development levels. This book has revealed how it affects individuals' cognitive development levels and the artificial intelligence existing in education by modeling with artificial neural networks.

In this book there is the 9 chapter, to researchers in this book, showed what should be done in order to improve the stage of individuals, which structure of the brain develops, and how it is shaped by artificial neural networks. In addition, this book goes beyond the known and shows how learning areas can be developed depending on the structure of the brain and how new information is affected by the cognitive development of individuals during the education and training phase.

who helped me in this book, I would like to thank the supervisor Prof. Dr. Musa Selimi, Assistant. Prof. Dr. Bahri Gjinovci, Assistant. Prof. Dr. Florian Miftari, Prof. Dr. Naser Sahiti, Prof. Assoc. Dr. Mimoza Ibrani, Dr.Sc. Gani Ibrahim, the Assistant Eron and Melike, who helped me in the project created thank you to all the University of "Hasan Prishtina", Faculty of Physical Education and Sport students.

Contents

Introduction and Aim	1
PART 1: EXERCISE and COGNITIVE FUNCTION	5
The Relationship Between Exercise and Cognitive Function.....	5
Exercise and Cognitive Function	5
Effects of Physical Activities on Cognitive Functions.....	8
Exercise Gray Matter and White Matter	9
The Effect of Exercise on Cognitive Performance.....	11
Aerobic Exercise and Cognitive Development.....	12
Physical Exercises and Cognitive Development	16
Physical Activity and Cognitive Function.....	19
Motor Imagery and Cognitive Function	20
PART 2: NEUROSCIENCE and SPORT	21
PART 3: BRAIN and EXERCISE	23
Developmental Periods and Brain.....	26
Developmental Processes of the Brain during Adolescence	28
Teaching Methods and Brain Development	29
How Physical Exercise Makes the Brain Work Better	30
Effect of Exercise on the Brain	32
Physical Activity and Brain.....	34
The Effect of Exercise on the Structure of the Brain	36
Aerobic Exercise and Brain	37
The Effect of Movement on the Brain.....	43
Mind and Brain	44
The Effect of Exercise on Memory.....	45
Effects of Aerobic Exercise on Brain Structure.....	48
PART 4: PHYSICAL ACTIVITY and LEARNING	51
Learning and Memory.....	52
Exercise and Learning	52
Physical Activity and Learning Behaviors.....	54
Movement and Academic Performance.....	55

PART 5: CREATIVITY and BRAIN.....	57
Exercise, Brain, and Creativity.....	58
The Relationship between Creativity and the Brain.....	59
Using Thought Form by Using Right and Left Lobes of the Brain Together.....	60
Creativity and Cognitive Processes	61
Mental Processes and Bodily Connection.....	62
PART 6: CREATIVITY and EXERCISE.....	63
The Effect of Physical Exercise on Convergent and Divergent Thinking.....	64
Aerobic Exercise and Creativity	66
Physical Activity and Creativity	67
PART 7: PHYSICAL ACTIVITY and COGNITIVE DEVELOPMENT in CHILDREN.....	71
Linking Children's Cognition by Physical Activity	71
Contemporary Explanations of the Mental Wounds of Physical Activity.....	73
PART 8: ARTIFICIAL NEURAL NETWORKS	75
Feed Forward Artificial Neural Networks	75
The Relationship of Artificial Neural Networks with the Brain	75
Artificial Neural Networks in Education.....	77
Advantages of Artificial Neural Network.....	78
Disadvantages of Artificial Neural Network.....	79
PART 9: ARTIFICIAL INTELLIGENCE.....	83
FINDINGS	98
CONCLUSION.....	110
REFERENCES	127
