# ÖN SÖZ

*'Stop doing that, ia komu skazala! (Pavlenko, 2004)\**

“İkinci dilini ana dili gibi konuşur”. Bu sözü hepimiz bilir, bu özelliğe sahip olduğunu düşündüğümüz kişilere giptayla bakarız. Ancak, pekçoğumuz ikinci bir dilde “ana dili konuşucusu” düzeyine erişmek için birçok koşulun aynı anda bir arada olmasıyla gerçekleşebileceğinin farkında değilizdir. Bazı bireyler dil seslerini çıkarmaya yatkındır, bu bireylerin bir dilin aksanını çok iyi bir şekilde taklit ederek ana dili konuşucusuymuş gibi algılanması mümkündür. Ancak burada sorulması gereken soru, o bireyin diğer tüm dil özelliklerini de aynı başarıyla kullanıp kullanamadığıdır. Örneğin, aynı birey, bir olayı anlatmak için kullandığı dilbilgisi yapıları, sözcük çeşitliliği, günlük yaştanımızda çok sık kullandığımız deyim ve atasözlerinin sıklığı açısından bir ana dili konuşucusun düzeyine ulaşabilir mi ? Ya da çok iyi kelime dağarcığı olan, ancak bildikleri sözcükleri bir ana dili konuşucusu gibi sesletemeyen ya da uygun bağamlarda kullanamayan bireylerin ikinci dilini ana dili gibi konuştuğu söylenebilir mi ?

Ana dili ediniminden farklı olarak, çoğu durumda ikinci dilimizi mevcut bir dil sisteminden yararlanarak öğreniriz. Bebekler için ilk defa deneyimledikleri çevre ve ona ait tüm kavramlar birbiriryle entegre olarak yerlesir. Biberonunu yere düşürdüğü için annesinden azar işten bir bebek hem olayı, hem de annesinin tepkisini gösterdiği dilsel uyarınla ilk kez karşılaşmıştır. Bu ikisini harmanlayarak ıçselleştirir. İkinci dil ediniminde ise yeni öğrendiğimiz dil yapılarını ve o kültüre özgü yeni kavramları mevcut olan kavram sistemimizle karşılaştırıp yorumlama eğilimi içindeyizdir. Yeni öğrenilen bilgilerin kalıcı olmasını sağlamaya çabasıyla, hali hazırda benzer bilgilerimiz varsa bunları benzeştirmek ya da zıtlıklar oluşturmak isteriz. Bunu yaparken ana dilimizin yönügesinden çıkamayız. Bu durum dil seslerinin çıkarılmasından sözcük anımlarının yorumlanması, dilbilgisel çözümlemeye kadar uzanır. Örneğin, yaşamın ilk yılında yerleşmiş ana diline ait ses çeşitliliği yeni bir dilin seslerini algılamada etkin bir rol oynar. Mevcut ses örüntüsünü bir şablon olarak kullanır, yeni duyduğumuz sesleri bu şablonla kıyaslayarak yorumlamaya çalışırız. İki dil arasındaki seslerin benzerliği,

\* “Yapma şunu, kime diyyorum !” Çocuğunun yaptığı yaramazlığa sınırlenen bir annenin ikinci dili İngilizcede uyarı yapmak isterken ana dili Rusçaya da başvurma zorunluluğunu hissetmesi

ikinci dildeki sesleri çıkarmadaki başarımızı arttırmak, farklılıklar ise sorun yaratır. Zira, beynimizde bu sesleri üretmemizi sağlayacak nöroanatomik yapı olgunlaşmasını erken yaşta tamamlamış ve ana dili seslerini çıkartma konusunda uzmanlaşmıştır. Bir başka deyişle, yeni öğrendiğimiz dilin seslerini çıkartmamız için gerekli altyapı (nöroprogram) mevcut değildir. Bireylerin kişisel çabaları, uzun süreli çalışmaları, yetenekleri vb. unsurlar nispeten bu durumu iyileştirse de, sayıca fazla örnek bulmak mümkün görünmemektedir. Ayrıca, dil sesleri cümle içinde her dile özgü bir ahenkle oluşurlar. Dilin bürünsel özellikleri olarak bilinen bu durumda bireyler tek tek dil sesleri üzerinde gayretle çalışsa da, bunu dilin bütününe yayarak o dilin ezgisine benzer bir dil çıktısı üretemeyebilirler. Benzer şekilde, bir dili, özellikle formal eğitim ortamında öğrenen bireylerin yaptıkları dilbilgisel hatalar da mevcut dil sisteminde yararlandığımızı destekleyen bir durumdur. Ana dili ve ikinci dil arasındaki benzerlikler sorunsuz öğrenilip başarıyla kullanılırken, farklı dil yapıları öğrenenler için zorluk teşkil etmekte, onların yerine ana dilindeki benzer yapılar kullanılmaktadır. Eşdeğer yapıların olmaması durumunda ise ikinci dili öğrenen bireylerin zorluk yaşadıkları bilinmektedir. Buradan da anlaşılmacı üzere, ana dilinden sonra öğrenilen dilde mevcut dil seslerinin ve yapılarının varlığı, o dilin öğrenme sürecini farklı şekillerde etkilemektedir. Her ne kadar sözcük bilgisinin sesbilgisi ve dilbilgisine nispeten daha kolay edinildiğine dair güclü kanıtlar olsa da, bir dildeki sözcüklerin edinimi sadece sesletim, yazım, anlam ya da isim, sıfat, fiil gibi dilbilgisel kategorilerden ibaret değildir. Sözcükler, o dilin konuşucularının ait olduğu kültürün en önemli yansımalarıdır. Dilin tarihçesidir. Tüm duyu yükünü taşıyan öğelerdir. Bu noktada hem kültürel arka plan, hem de bir dilin, onu konuşan birey için ne ölçüde duygusal ifade ettiği önem kazanmaktadır. Sinirbilim alanında yapılan çalışmalar, mantıklı düşünme, karar verme, problem çözme süreçlerinde duyguların hayatımızın merkezinde olduğunu ortaya çıkarmıştır. Dilin de insan yaşamında bir o kadar önemli olduğu bilindiğine göre, dil ve duyu ilişkisi iki dil bilen bireyler açısından en az diğer dil öğelerinin edinimi kadar önemlidir. Bu kitapta, ikidilli bireylerin bildikleri dillerin zihinsel işleyişi ve duyu yükü 60'lı yillardan sonra ortaya çıkan psikodilbilim (ruhdilbilim) ve onu teknolojik gelişmelerle hız kazanan sinirdilbilim (nörodilbilim) açısından irdelenmiştir. Sözü edilen bu disiplinlerde birçok dil üzerinde sayısız yayın yapılmasına rağmen, Türk dili ya da Türkçe ve diğer dilleri bilen ikidilli / çokdilli bireyleri araştıran çalışmalar nispeten azdır. Literatürde Türkçe yayın sayısının azlığı da bu durumun bir yansımasıdır. Bu kitap, bu alandaki boşluğu doldurmayı hedeflemektedir. Kitabın hedef kitlesi, öncelikle psikodilbilim ve nörodilbilim

alanlarda akademik çalışma yapmak isteyen okuyuculardır. Dilin zihin temsilleri ve bunu gerçekleştiren beyin alanları ile ilgili çalışmalar ile ikidillilik ve iki dilin duygusal yükü kapsamında sıkılıkla araştırılan konu başlıklarları derlenmiştir. Bu sayede hem yapılan çalışmalar hakkında bilgi vermek, hem de gelecekte yapılacak çalışmalara ışık tutmak amaçlanmıştır. İki veya daha fazla dil bilmenin adeta bir gereklilik halini aldığı günümüzde, hedef kitlenin yanı sıra, bu alana ilgi duyan herkesin karşılaşabileceği durumlar ile ilgili bir fikir sahibi olması umulmaktadır.

# İÇİNDEKİLER

<b>GİRİŞ .....</b>	<b>1</b>
Kitabın Bölümleri .....	3
<b>BÖLÜM 1</b>	
<b>DİL VE BEYİN</b>	
Dil Nedir?.....	5
Dil Edinimi.....	7
Dil Ediniminin Aşamaları .....	8
Dil Ediniminde Kritik Yaş Dönemi.....	11
Beyinde İşlevlerin Özelleşmesi.....	18
Beyin Yarı Küreleri ve Dil İşlevleri .....	23
Sol Yarı Küre ve İşlevleri.....	23
Klasik Dil Alanları .....	24
Sağ Yarı Küre ve İşlevleri .....	27
İki Dilin Beyin Yarı Kürelerindeki Yerleşimi .....	28
Dil ve Bellek .....	30
<b>BÖLÜM 2</b>	
<b>DUYGULAR</b>	
Duygu Nedir?.....	40
Beyindeki Duygu Merkezi: Limbik Sistem ve Dil Edinimi .....	48
Duygular ve Bellek .....	52
<b>BÖLÜM 3</b>	
<b>DUYGULARIN DİL İLE İFADESİ VE ALGISI</b>	
Zihinsel Sözlükçe ve Sözcüksel Erişim .....	55
Duygu Sözcükleri.....	60
Duyguların Dil ile İfadesi ve Algısının Beyin Temellerini Araştıran Psikodilbilim ve Nörodilbilim Teknikleri .....	66
Bedenselleştirme .....	69

## BÖLÜM 4

### İKİDİLLİLİK

İkidilli Bireylerde Zihinsel Sözlükçe ve Sözcüksel Erişim .....	85
Dil Tercihi (Düzenek Değiştirimi) .....	100
İkidillilikte Dillerin Beyindeki Kontrolü .....	106

## BÖLÜM 5

### İKİ DİL VE DUYGULAR

İkinci Dilde Duygu İçerikli Dil Algısı ve İfadesi.....	112
Kültürel Farklılıklar ve Duygu Sözcükleri .....	125
Sınıf Ortamında Öğrenilen Dilde Duygu Algısı ve İfadesinin Bilişsel Temelleri .....	129
Dilin Duygu İçeriği ve Dil Sınıflarında Ana Dili Kullanımı.....	140
<b>SONUÇ.....</b>	<b>147</b>
<b>KAYNAKÇA.....</b>	<b>149</b>
<b>ÖZGEÇMİŞ.....</b>	<b>167</b>
<b>İNDEKS .....</b>	<b>169</b>
