*Danışmanlık aşamasında öneriler;*

Hastanın başetme mekanizmaları gözden geçirilerek geliştirmesi sağlanabilir. Tedavi aile ve sağlık personelleri ile iş birliği içinde uygulanmalı, tedavi süresinde yoksunluk belirtilerinin hormonal yapılardan kaynaklandığı bilinmeli, bu duruma uygun bir yaklaşım geliştirilmelidir. Hastanın yoksunluk belirtilerini abartarak, ağrı kesici gibi ilaçları istemesinin altında yatan fizyolojik bağımlılık süreci bilinmelidir.
